

Alstom Depot - Widnes

Client: RCA Consulting | Value: £360k | Project Start: 02/21 | Project End: 11/21

Delivering works safely, on time and on budget

SPL Powerlines UK were commissioned by RCA Consulting to undertake the installation of the OLE system on a newly installed track section at the Alstom Train Care Depot in Widnes.

The Project team worked closely with Alstom, Network Rail and RCA, to design, construct and commission the OLE to utilise the newly installed track.

All work was well planned and delivered safely on time and within allocated budget. The success of the delivery has additionally lead to other opportunities.

WORKS DELIVERED BY SPL POWERLINES UK INCLUDED

Design and Build for the new installed track

Piling and construction of OLE system feeding into the Network Rail Infrastructure

Undertook section proving of the new system
